

Scholars' community and partnerships support Fundação Estudar activities

São Paulo, April 2010 - Fundação Estudar's role model, whose objective is providing sustainability to its activities, consists of a solid structure of participation of the scholars' community and financial support of enterprises and people who believe in Fundação's commitment to the investment in future leaderships.

The scholars voluntarily repay, at least, the investment in their studies to allow the continuance of a virtuous cycle of leaders' preparation. After graduating and repaying their scholarships, they keep donating and participating actively in the community.

A wide group of sponsors and partners guarantee Fundação Estudar's activities, contributing with more than half of its annual budget. Currently, 30 people and 37 enterprises are FE sponsors or partners. Sponsors contribute financially and partners donate their time and services to assure FE internal operation and the programs with its community.

These people believe, as well as Fundação, that the ethical and intellectual formation of very qualified young people is an efficient way of producing positive impact in the society.
